Objective

Highly motivated and detail-oriented Computer Science undergraduate with strong skills in web development, networking, and software engineering. Proven ability to design and implement innovative solutions using modern technologies. Seeking dynamic internship or job opportunities to contribute technical expertise and grow in a collaborative environment.

Skills

HTML, CSS, JavaScript, SQL, OOP, C#

Education

Bachelor's in Computer Science (BSCS) (Undergraduate)
Majors: Web Development, Networking
Karachi Institute of Economics and Technology (KIET)

Experience

Fresher

Projects

- Quiz Application using API (Open Trivia Database) - A web-based quiz app using JavaScript and API integration.

- Weather App using API - A simple weather forecasting application using open weather API.

- Restaurant Management System - Implemented using Software Engineering concepts like models and structured planning.

- AI-Powered Maze Solver - Solved mazes using BFS, DFS, UCS, and A* algorithms.

- Salary Management System - Developed using Object-Oriented Programming (OOP) concepts.

- Hotel Management System Network - Simulated a complete hotel network using FTP, Email, DNS, DHCP, and Subnetting in Cisco Packet Tracer.
